impudence of their circular more remarkable, it neems at the very time when it was feated, the Fulton line and "all the lines of the compact as contemplated," were already completed, except about five miles of the proposed double track, then in progress and since faished. The cash recepts of the year, from all sources, have been such that this company, after constitute all their final, paying off their floating debt, interest and every otter expense, will have a balance on hand sufficient to pay a dividend of 10 per cent in cash on the 1-t of August next, and leave a very large surplus. Yet the managers propose to pay at that time only five per cent in cash, and five in a further worthless issue of stock—and they have declared this to be their intention, without any authority from their stockholders.

declared this to be their intention, without any authority from their stockholders.

This road, as it stands, is by far the best railroad property in this country. It is a left owned by Eastern men, who, if they do not look after their inversets at latte more sharply, will very soon have the satisfaction of seeing its brains isnocked out by gross mismanagement. Unleas they wish to stand supplied by and see the legitimate profits of their capital was ed, quandered, or confiscated in some unexplained way, they will be on hand at the next annual election of offsetors, at Chingo, on the 4th of June next, and put in a see of mee who will know enough to abstain from writing fooish and unauthorized circulars, and to pay them the divident of 10 percent; in cash, which unquestionably belongs to them on the lat of August next. It necessary, they will give them positive instructions to seel enough of the 8t 500 000 ot bonds remaining on hand to replace the profits which have been heretofore diverted and applied to construction account.

have been heretofore diverted and applied to construction account.

Eastern stockholders complain, with reason, of the small returns of their investments in Western raticods. But this result is for the most part the direct consequence of their own neglect and laxi sess to failing to attend the annual meetings of their companies. Their agents, as by presuming on this negligence and mexcussole ignorance of their own affairs, usurp unauthorized powers to dilute and damage their property; impodently announce to them that 10 per cent is the most which hastern men are entitled to receive on Western investments; (nothing per cent being the toe common maximum.) and under various pretexts and in various ways contrave to fob them of with one-half or one-third of the cash dividends which their property has actually earned.
